WORK EXPERIENCE

Full Stack Developer, Firmos
2023 – 2025 | Remote, US

- Built 5+ full-stack web applications using React, Vue, Angular, Node.js, and Express.
- Integrated 20+ external APIs to support scalable business workflows.
- Led database operations using PostgreSQL, MySQL, and Supabase.
- Improved deployment performance via Docker + Vercel CI/CD pipelines.

Automation Engineer, Jospaka Ventures
2024 – 2025 | Remote, US

- Automated 12+ recurring workflows using n8n and Power Automate, reducing manual hours.
- Developed Python data processing pipelines for batch integrations.
- Implemented automated approval and documentation processes using Power Automate.

PROJECTS

Signals-First B2B Prospect Enrichment Pipeline

- Built enrichment pipeline using SERP, GDELT, LinkedIn & LLM summarization using OpenAI.
- Automated 5k-row batch processing with concurrency and merging.

N8N Container using Microsoft Azure

- Hosted n8n container on Microsoft azure reducing cost spent on automations.
- Developed and integrated with Postgres database as well as a dump for backups.

AI-Powered Marketing Content Platform

- Integrated 6+ external APIs (OpenAI, Google Ads, Supabase, GoHighLevel, Frame.io [↗](#)) for automated marketing asset generation and CRM workflows.
- Built with Next.js and TypeScript; deployed on Vercel.
